12B6FSLQ

Product Description:
This 12B6FSLQ Self-Lock F Type Connector can be mounted easily on the cable without the use of compression tools.
The connector is automatically attached to the cable when the cable is pushed fully into the connector.
The Teeth-Ring in the body of the Connector is specially designed to allow the cable entry
but inhibits removal of the cable after insertion into the connector.
The centre barrel is fixed and is not reliant on the Connector being installed to secure the cable in place.
Simply strip the cable and slide on the plug. It is as simple as that.
As no special tools are required for installation, the 12B6FSLQ Self-Lock F Type Connector
are the perfect high-quality solution for professional and DIY applications.

Features:
Versatile universal connector for RG6 Coaxial Cable
No special tools required. Simply strip the cable and slide on the plug.
