RJ45 8P8C Cat6 Modular Plugs
Part No: 12IDC6RJ458P8C

Description:

- High quality RJ45 CAT6 Pass Through (Open End) 8P8C Modular Plug LAN Network Connector.
- RJ45 design allows the wires to pass through the connector so the twists in each pair can be pulled closer to the contacts than conventional plug.
- Maintaining the twists to the point of termination significantly decreases crosstalk and markedly increases performance.
- Substantially improve noise immunity at all frequencies, especially above 30 MHz when cable balance starts to significantly degrade.
- Category 6 performance per EIA/TIA B.2.
- 8 Pin Modular Plug for UTP Cat6, Backwards compatible with Cat5e solid or stranded cable.
- For solid cable up to 24AWG & stranded cable 24AWG to 28AWG.
- Gold plated pins (50 μ) for better data transmitting and higher signal strength.

Package Content:

- Poly Bag.
- 100pcs per bag.
