StorageTek®
Complete Storage Solutions

Competitor Comparison Guide

	StorageTek	Competitors
1 StorageTek cases feature dual front-facing fibreglass/nylon/ABS clasps for superior secure locking.		
2 Unlike our competitors, StorageTek cases incorporate a padlock eyelet, making them individually lockable with a padlock of your choosing.		
3 Clear, removeable label holder, with blank label insert, that allows you to easily identify and change the label of each case.		
4 Ergonomic handle design for a more comfortable grip.		
5 The StorageTek brand is stamped into the ABS plastic lid for longevity, unlike our competitors which will wear off with use.		
6 StorageTek cases are cross-compatible with other brands. This can cut down setup costs and facilitate replacing old or broken cases.		
7 StorageTek cases feature modern rounded and sloped corners, not only for aesthetics, but also for added durability and ease of use.		
8 Unlike our competitors, large StorageTek cases not only include removable dividers in the case, but also removeable dividers in the pull-out tray.		
9 All StorageTek frames arrive completely assembled, to save time and avoid accidental damage to the product during the assembly process.		
10 StorageTek frames also come standard with a heavy-duty, powder-coated hammertone work plate on top.		
11 Unlike our competitors, all StorageTek cabinets & frames are packed in protective packaging, to ensure minimal damage on arrival.
